

6 important factors to consider when selecting your water conditioning system:

PRICE

Nobody beats Safeway Water® for price and performance! We offer **top-of-the-line equipment** and **highly affordable prices!**

PERFORMANCE

SALT USAGE

Safeway Water valves typically use **40% to 60% less salt** and **57% less water** per regeneration, compared to mechanical metered valves, sold by our competition.

WATER CONSUMPTION

CUSTOMIZATION

Our valves have **fully adjustable cycles**, so we can make adjustments to meet your specific requirements.

Safeway Water systems offer HIGH PERFORMANCE and come with HIGHLY AFFORDABLE PRICES!

Your best buy

considering price & performance!

Safeway Water® high efficiency water conditioning systems offer both high performance and affordable prices!

Safeway Water conditioning systems come with our NSF certified, electronic control valve featuring advanced diagnostics. Systems include by-pass; mineral tank; resin; brine tank with safety float to prevent brine water overflow; brine well; salt grid and the best warranty in the business!

Our metered control valves come with advanced electronics to provide increased efficiency for savings on salt and water!

Features & benefits:

- Valves operate at lower salt settings to reduce salt usage by 40% or more per regeneration.
- Systems use 57% less water per regeneration compared to mechanical metered valves.
- Operational data is displayed on the valve's large LED screen so you always know what's going on.
- All cycles are adjustable so your valve may be programmed for your particular requirements.
